

SETTING A NEW STANDARD

Your partner in achieving sustainability excellence

Sustainable solutions that are clear, practical and fit-for-purpose.

We don't overcomplicate sustainability.

We make it actionable so your business can focus on delivery, performance, and measurable outcomes.

How we work

We've set a new standard for sustainability. We make sustainability simple so your business can focus on actions. We utilise an efficient, fit-for-purpose, 'no frills' approach to setting businesses up for success.

NS

What makes us different

We support organisations navigating increasing sustainability expectations - providing clarity, structure, and confidence to move from intention to implementation.

We provide support to organisations that

- ✓ Are looking to formalise their sustainability commitments and direction
- ✓ Need clarity and confidence in articulating their sustainability ambition to stakeholders and investors
- ✓ Focus on efficient compliance reporting
- ✓ Require a strategic framework to integrate sustainability into their business operations

Who we are

We are innovators. Naturaliste Solutions was founded on the belief that grit, adaptability and a desire for better will change our world. We see the bigger picture and understand the role we all must play to adapt and create a sustainable future. By connecting the dots for organisations and utilising their strengths, we are able to create effective change and help drive industry towards future prosperity.

We combine strategic insight with practical delivery, helping organisations move beyond intention and embed sustainability into the way they operate.

About our Director

Rebekah Ettridge is an expert in sustainable business development and adaptation, with a background in the private sector delivering climate strategies, management systems, stakeholder engagement programs, and non-financial disclosures. As founder of Naturaliste Solutions, she helps businesses navigate the complexity of sustainability and embed practical, value-driven practices that drive long-term prosperity.

Our Values

01

Passion

Devotion to sustainable improvement

02

Excellence

Boutique service, global reach

03

Innovation

Thought leadership grounded in practicality

04

Integrity

We practice what we preach

Global Mining Organisation

Case study

Client Profile

Global gold mining company operating across multiple regions with complex regulatory and reporting requirements.

Approach

We worked with the client to bring structure and alignment across their sustainability function. This included:

- Refining their sustainability strategy
- Designing a practical management system to align sites and functions
- Establishing clearer data processes to support reporting
- Aligning disclosure with GRI and climate-related expectations

Challenge

Sustainability activities were happening across the business, but there was no consistent structure connecting strategy data and reporting. This made it difficult to produce clear, reliable disclosures and keep pace with increasing investor and regulatory expectations.

Outcomes

- More consistent sustainability practices across operations
- Improved data quality and confidence in reporting
- More efficient and streamlined reporting processes
- Stronger readiness for assurance and external scrutiny

Strategic Value

The business now has a more integrated and scalable approach to sustainability, with systems that support both operational delivery and credible disclosure.

Our Impact Delivering measurable impact across industries and geographies

We partner with organisations operating in complex, high-impact environments where sustainability performance is increasingly tied to risk, compliance, and long-term value creation.

“

NS worked with us to develop customised, fit-for-purpose training to our global teams - including online and F2F formats. They provided timely support for site team members who needed help, transparent and frequent communication to management and delivered company-formatted documentation within our intranet.”

Broader corporate sector

Boutique service. Global reach.

Delivered projects in over 30 countries, remotely and in person.

30+

Years combined experience in sustainability

Our services

Sustainability Strategies

We develop clear, actionable sustainability strategies aligned with business objectives, regulatory requirements, and stakeholder expectations, providing a strong foundation for long-term performance

Governance & Management Plans

We design practical governance structures, policies, and management plans that embed sustainability into business operations and decision-making processes.

Modern Slavery Risk Assessments

We identify and assess modern slavery risks across operations and supply chains, supporting compliance with legislative requirements and strengthening ethical sourcing practices.

Data Management & Software Integration

We develop efficient sustainability data systems and integrate software solutions that improve data quality, streamline reporting, and support informed decision-making.

Climate Disclosure Reporting

We support organisations to prepare climate-related disclosures aligned with frameworks such as TCFD and AASB S2, ensuring clarity, accuracy, and defensibility.

Sustainability Reporting & Disclosure

We deliver clear, compliant, and stakeholder-ready sustainability reports aligned with leading frameworks, translating complex data into meaningful insights.

Infrastructure Sustainability (ISAP) Advisory

Deliver infrastructure that stands up to scrutiny: now and into the future.

Naturaliste Solutions offers specialised advisory services led by our Managing Director, Rebekah Ettridge, an Infrastructure Sustainability Accredited Professional (ISAP).

This dedicated service supports organisations seeking to achieve an Infrastructure Sustainability (IS) rating, providing direct access to accredited expertise across the full project lifecycle.

We work alongside project teams, asset owners, and contractors to embed sustainability into decision-making - ensuring outcomes are not only compliant, but commercially sound, practical, and measurable.

What this means for your project

Achieving an IS rating is more than a certification exercise. It's a structured approach to delivering infrastructure that performs across environmental, social, and governance outcomes.

Our ISAP-led advisory helps you:

- ✓ Navigate ISC requirements with clarity and confidence
- ✓ Integrate sustainability into project design, procurement, and delivery
- ✓ Strengthen your position in bids and government-funded projects
- ✓ Reduce risk through structured, auditable sustainability processes
- ✓ Demonstrate measurable impact to stakeholders and investors

We don't just interpret the framework - we help you operationalise it across your project lifecycle.

Our Approach

We take a fit-for-purpose, implementation-focused approach, ensuring sustainability is embedded without unnecessary complexity.

With direct involvement from an ISAP, our support includes:

- IS Rating strategy and gap analysis
- Credit interpretation and compliance planning
- Evidence development and documentation
- Contractor and stakeholder alignment
- Submission preparation and audit support

We don't just interpret the framework - we help you operationalise it across your project lifecycle.

Why Naturaliste Solutions?

As sustainability practitioners working across mining, construction, and government sectors, we understand the real-world constraints of infrastructure delivery.

NS

Our ISAP capability is backed by:

Direct access to accredited expertise through our Managing Director

Deep experience in sustainability systems, reporting, and compliance

Practical, on-site understanding of project environments

A focus on efficiency - cutting through complexity to deliver outcomes

Alignment with broader ESG frameworks and regulatory requirements

Position your project for success

Whether you're targeting an IS rating, strengthening a bid, or embedding sustainability into infrastructure delivery, our ISAP-led advisory ensures you're working to a recognised, credible standard - without slowing your project down.

Get in touch to discuss how we can support your next project.

Training and Courses

We design and deliver bespoke training workshops, both online and in-person, focusing on sustainability governance, strategy, reporting, and best practices. Each session is designed to be practical, engaging, and industry-specific, ensuring participants gain real-world skills that can be immediately applied in their roles.

01 Sustainability for executives

Participants will learn to identify key sustainability risks, opportunities, and integration strategies to create value within their organisation.

02 Sustainability strategy

Equips leaders with tools to develop a strategy that aligns with corporate goals while addressing regulatory stakeholder expectations.

03 Sustainability governance

Explore best practices and governance models to ensure compliance and foster long-term sustainability.

04 Sustainability reporting

Learn how to develop and manage reporting frameworks, timelines and deliverables to ensure transparency and compliance.

“

Our training was exceptionally well-organised and thoughtfully prepared, engaging, and well-paced, catering to a diverse group of participants. The combination of presentations and video content kept the session dynamic and informative. The thoughtful approach ensured that everyone gained valuable insights, making it a highly effective and rewarding learning experience.”
